ABOUT ME

- Eager to apply 20+ years of experience on Business IT Projects
- System Architect with expertise on Middleware and Vulnerability Testing
- Cloud Security Engineer supporting on-prem systems and public platforms

EDUCATION

UTN.BA Electronic Engineer

National Tech University

2000 Graduate File # 93987-4

THESIS

iAPX80C52 data exchange terminal

ASM SYN/ACK Protocol implementation

SKILLS

Cloud Authentication

SAML · OIDC · OAuth2 · Web Tokens

Cryptography · Ciphers · PKI

PowerShell · Perl · Shell Scripting

Vulnerability Assessment Testing

WAF · Thread Modeling · Monitoring

Network Gateway Troubleshooting

Postman · Wireshark · Fiddler

Burp Suite · Kali Linux

CERTIFICATIONS

- Azure Administrator AZ-104
- Azure Security Engineer AZ-500
- Azure Fundamentals AZ-900

WORK EXPERIENCE

ExxonMobil 2022 - 2024

Business Support Center Argentina S.R.L. > System Architect > Azure Subscription Owner

- Eliminated performance degradation on Azure Web Apps after visibly improving elastic pool dynamics
- Exceeded business expectations achieving substantial savings by rescaling all Azure implementations
- Duplicated the load and extract speed of corporate SQL databases via a customized VM based solution
- Strategized periodical TLS certificate renewals for critical on-prem F5 BIG-IQ load balancers
- Multiplied business user accessibility to statutory Apps by diversifying on-prem licensing servers
- Unleashed advanced infrastructure capabilities after a POC study to remove gateway proxy dependencies
- Streamlined several Azure Front Door migrations successfully integrating hybrid SSO authentication
- Tirelessly facilitated technical mentoring to IT Operations Engineers offering upfront Architect advise
- Led by example cultivating healthy IT Team interactions during endless troubleshooting sessions

Agustín Hernán Borrajo

Enterprise System Architect

WORK EXPERIENCE

Business Support Center Argentina S.R.L. > Cybersecurity Champion > Azure Administrator

2020 - 2022

- Granted broader access to solutions consumed by large audiences after improving Web App Firewall rules
- Simplified field work for Azure ADAL to MSAL migration involving extensive code dependencies
- Decreased to zero the amount of critical cybersecurity findings stewarding their full remediation
- Conducted cybersecurity research sessions relying on Postman, Fiddler and PowerShell custom scripts
- Organized and coordinated over 150 mandatory white-box VAT cybersecurity tests for high-risk Apps

Business Support Center Argentina S.R.L. > Middleware Web Hosting & Authentication

2015 - 2020

- Consolidated the IT cybersecurity posture deploying heavily customized App authentication monitoring
- Strengthened external authentication schemas and IAM policies gradually implementing OWASP standards
- Implemented external business collaboration by integrating on-prem SharePoint via WS-FED and SAML
- Accelerated urgent system configurations and infrastructure updates by coding a PowerShell solution
- Mentored and enabled Middleware Engineers by creating a centralized web-based knowledge repository

Business Support Center Argentina S.R.L. > Enterprise Monitoring & Automation

2008 - 2015

- Maintained the event correlation logic of a strategic monitoring system serving thousands of users
- Developed and implemented a stable Perl engine to monitor 500 refinery servers and 80 Oracle DBs
- Programmatically monitored management servers coding UX scripts for granular cyber threat detection
- Modernized Unix servers monitoring by developing a web interface capable of querying network nodes

CubeCorp Argentina S.A. > MCI Line CR > VERIZON T1 Internet Dedicated Access

2004 - 2008

- Network Administrator responsible for business DNS zone maintenance and full IP service migrations
- Integrated external BGP routers with corporate Frame Relay cascades becoming a Middleware Engineer
- Restructured Verizon metropolitan carrier lines proving skills as a Switch Integrity Administrator
- Systematized IT Audit assessments compatibilizing Lucent 5E and Nortel DMS-500 Class5 Switches

Teletech Argentina S.A. > BELLSOUTH Fast Access DSL and Home Networking Plus

2003 - 2004

- Achieved several complex DSL service registrations and validated multiple company user contracts
- Granted advanced Bellsouth customer support and technical pre-validations of IFITL and DSL lines
